

SEEP

Schools Energy Efficiency Programme

Free introductory workshop for potential Tranche 2 schools
28th November 14:30 – 16:30 @ G13, 10 Woodcock St, B7 4BL

Energy Efficiency and Generation, Funded & Guaranteed

Tranche 1 of the SEEP programme is now coming to an end. This has seen 12 schools benefit from circa £1m of interest free loans and council contributions to get new energy efficiency and energy generation equipment. Half of the schools have now got solar PV arrays (picture above from Little Sutton), five schools have got new boilers, and all schools have had new LED fittings installed. Hear first hand from SEEP Tranche 1 schools how, together, we will achieve circa £85K of savings per year, including free electricity & income from Solar PV. The contractor, SSE, will also be there to discuss what other energy efficiency measures we can incorporate this year.

Come and join us on the **28th November** to find out how to make the best of this unique opportunity. Opt-in forms will be available on the day.

Please email eds.enquiries@birmingham.gov.uk to reserve your place.
Tea & coffee provided.
