

BIRMINGHAM DEVELOPMENT PLAN

5-Year Land Supply 2014-19

September 2014

5-Year Land Supply 2014-19

Summary

The City has **5.9 years** supply. This is derived from a 5-Year requirement of **11,865** dwellings (including a 5% buffer) and a supply of **14,041** dwellings.

1. Introduction

Paragraph 47 of the NPPF requires local authorities to:

“...identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements. To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable.”

This paper sets out how the City’s 5-Year supply has been determined.

2. Establishing the 5-Year Housing Requirement 2014-19

2.1 The BDP Housing Requirement 2011-31

The BDP is planning for increased levels of housing provision in challenging circumstances. Over recent years the difficult economic conditions have had a major impact on the house building industry which resulted in significant reductions in both housing starts and completions. At the same time household projections indicate that a much increased level of housing provision is required.

For the plan to be deliverable it is necessary to acknowledge that it is unrealistic to expect a large increase in housing delivery right away. It will take time for the measures being put in place to facilitate increased housing delivery (such as the Langley SUE) to start delivering housing. The BDP housing trajectory therefore adopts a stepped approach to provision. The trajectory is set out in Table 1.1

Table 1.1: Proposed BDP delivery trajectory 2011-31

Time period	Years in period	Dwelling delivered in period	Dwellings delivered per annum
2011-2014	3	3,900	1,300
2014-2016	2	3,800	1,900
2016-2021	5	12,500	2,500
2021-2031	10	30,900	3,090
2011- 2031	20	51,100	2,555

2.2 The 5-year Housing Requirement 2014-19

The 5-year requirement is determined by summing the annual provision figures set out in Table 1.1 for each of the following five years. The 5-year requirement for 2014-19 is **11,300** dwellings plus a flexibility allowance.

Table 1.2: The 5-Year Requirement 2014-19

Year	5 Year Period 2014 -2019
2014/15	1,900
2015/16	1,900
2016/17	2,500
2017/18	2,500
2018/19	2,500
Total	11,300

Paragraph 47 of the NPPF also states that an additional buffer of either 5% or 20%, depending on past performance must be added to this to ensure that there is sufficient supply to provide a choice of sites.

“...an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land”

The City Council’s track record in meeting housing targets is demonstrated in Table 1.3.

Table 1.3: Performance against recent housing targets

Plan / Year		Gross Dwellings	Demolitions	Net Dwellings	% of Net Target Delivered
Unitary Development Plan 1991-2011 (20 years)	Target	46,500	23,100	23,400	110%
	Delivery	49,361	22,942	25,658	
Regional Spatial Strategy 2001-2012 ¹ (11 years)	Target	28,800	13,200	15,600	126%
	Delivery	31,200	11,539	19,671	
Regional Spatial Strategy 2001-2014 ² (13 Years)	Target	34,800	15,600	19,200	118%
	Delivery	34,807	12,166	22,641	

¹ Whole years prior to revocation

² To present time including post revocation.

This shows that all recent housing targets have been exceeded. As such the 5% buffer is applicable. A 5% buffer requires a further **565** dwellings supply to be identified for the period 2014-19.

The Housing Requirement for the period 2014-19 is **11,865** dwellings.

3. The Supply of Ready to Develop Land

The housing capacity on deliverable sites is assessed annually through the SHLAA process. The purpose of the SHLAA is to identify sites which are suitable for housing development, assess how much housing the sites can deliver and assess when they are likely to be developed. A deliverable site is one which is available now, is in a suitable location for development and has a realistic prospect of being developed within five years.

The 2014 SHLAA identified a 5-Year land supply of **14,041** dwellings of which **11,881** are on identified sites and a further **2,160** dwellings are on unidentified sites.

3.1 5-Year Supply on Identified Sites

82% of the capacity deliverable within 5 years on identified sites has planning permission. A further 7% is currently allocated or is permitted development. Of the remaining 11% which have no formal planning status many are in the BMHT development programme and whilst they do not yet have planning permission are amongst the most certain to be delivered.

Table 3.1: Source of 5-Year Supply on identified sites

Status	Dwellings ³
Under Construction	4,034
Detailed Planning Permission	4,107
Outline Planning Permission	1,571
Allocation in Adopted Plan	120
Allocation in Draft Plan	392
Permitted Development	332
Other	1,325
Total Identified Supply	11,881

3.2 5-Year Supply on Unidentified Sites

The City has a long track record of delivering windfall sites - and even with the best efforts of the SHLAA to identify sites, windfalls continue to come forward and be developed in large numbers, as is inevitable for such a large and extensively developed urban area. The City Council's Empty Property Strategy, which has funding for the period 2013-18, is an intervention which has been put in place to ensure that more properties are brought back into use than fall vacant i.e. to impact on the general flows of vacancies which see some properties fall vacant as others are returned to use.

³ See SHLAA Final Report

Table 3.2: Source of 5-Year Supply on unidentified sites

Status	Dwellings ⁴
Windfalls	1,360
Vacant Dwellings	800
Total Unidentified Supply	2,160

Details of the methodology and assumptions used to establish the 5-Year supply are set out in the SHLAA report. A list of the sites in the 5-Year supply is at Appendix 1 and commentary on changes to the key 5-Year supply since 2013 is at Appendix 2.

4. Maintaining a Five Year supply in future Years

The nature of the stepped trajectory means that the 5-year requirement will increase over time from a low of **8,085** in 2011/12 to a high of **16,223** from 2021 onwards⁵. This is illustrated in Table 4.1 below.

Table 4.1: Future 5-Year Requirements based on BDP stepped housing trajectory

Year	5 Year Period				
	Low	Last Year	Current Year	Next Year	High
	2011-16	2013-18	2014-19	2015-20	2021-26 to 2026-31
2011/12	1,300				
2012/13	1,300	-	-	-	-
2013/14	1,300	1,300	-	-	-
2014/15	1,900	1,900	1,900	-	-
2015/16	1,900	1,900	1,900	1,900	-
2016/17	-	2,500	2,500	2,500	-
2017/18	-	2,500	2,500	2,500	-
2018/19	-	-	2,500	2,500	-
2019/20	-	-	-	2,500	-
2020/21	-	-	-	-	-
2021/22	-	-	-	-	3,090
2022/23	-	-	-	-	3,090
2023/24	-	-	-	-	3,090
2024/25	-	-	-	-	3,090
2025/26	-	-	-	-	3,090
Total	7,700	10,100	11,300	11,900	15,450
5% Buffer	385	505	565	595	773
5 Year Requirement	8,085	10,605	11,865	12,495	16,223

⁴ See SHLAA Final Report

⁵ Assuming that a 5% buffer remains appropriate.

In the short term the indications are that the city will be able to continue to demonstrate a 5-Year supply. In the medium (years 6-10) and longer term (>10 years), although it can reasonably be assumed that sites identified in the SHLAA will come forward into the 5-year supply, the nature of the stepped trajectory will make maintaining a 5-year supply more challenging.

The proposed sustainable urban extension at Langley, which will deliver 5,000 dwellings during the plan period from 2018, will make an important, and possibly critical, contribution to the 5-year supply in the medium and longer term. Not only will the Langley SUE contribute to the 5-Year supply, it will also have a major role to play in enabling the increasing delivery targets to be met.

5. Alternative Means of Determining the Requirement

Consideration was given to alternative means of determining the 5-Year housing requirement.

5.1 Past Rates of Delivery

Table 5.1 shows historical rates of delivery over the last 10 years.

Table 5.1: Historical Rates of provision 2004-2014

Year	Dwellings
2004/05	2,447
2005/06	3,141
2006/07	1,839
2007/08	2,988
2008/09	2,456
2009/10	933
2010/11	985
2011/12	1,187
2012/13	1,372
2013/14	1,598
2004-14 Total	18,946
2004-14 Annual Average	1,895

Using historical rates of provision to establish an annual average rate over the last ten years would result in a 5-Year requirement of 9,475, or 9,949 with a 5% buffer. This would equate to a 7.1 year supply.

5.2 The BDP Requirement Annualised

Taking the annual average of the 51,100 dwelling BDP requirement (2,555 per annum) would result in a 5-Year requirement of 12,775, or 13,414 with a 5% buffer. This would equate to a 5.2 years supply.

Appendix 1 Schedule of Sites

SHLAA Ref	Address	Dwellings	Status
E118	Shard End Crescent, Shard End	26	Under Construction
S126	Adj to 177 Dawberry Fields Road, Brandwood	7	Under Construction

Appendix 2

Commentary

The 5-Year Supply 2014-19

- There has been no change to the methodology since the 2013 Statement was published.
- Since the 2013 Position Statement was published 1,598 dwellings have been completed, and the rate at which planning permissions are being granted, and development is starting on site, has increased.
- The 5-Year requirement has increased from 10,605 dwellings in 2013 to 11,865 in 2014 in accordance with the BDP trajectory. This increase in the requirement from 2013 to 2014 is the largest annual increase of the plan period as it is impacted by two 'steps'.
- Windfall assumptions remain unchanged. They continue to be very conservative and offer flexibility.
- Larger allocations are now moving forward into the 5-Year supply - i.e. Langley, Yardley Brook & IPL
- There is a continued stepping up of the BMHT development programme.
- There is an increasingly upbeat message from developers with regard to implementing schemes.
- There are indications that the city centre market is returning following a number of detailed pre-apps with developers indicating an early start on site. However, a cautious approach to short term development in the City Centre continues to be taken.
- Permitted Development Right notifications have replaced Planning Permissions for the conversion of offices to residential.
- The allowance for vacant dwellings returned to use has been reduced to reflect funding for the strategy.

What's not in the 5-Year Supply?

The following have been omitted from the 5-Year supply:

Status	Dwellings	Reason
Under Construction	151	Sites stalled. No indication of resumption.
	286	Sites where build out will extend beyond 5 Years
Detailed Permission	202	Sites where build out will extend beyond 5 Years
	1,662	Sites where current permission is unlikely to be implemented
Outline Permission	1,380	Sites where build out will extend beyond 5 Years
	2,077	Sites where development is unlikely to start within 5 Years
