Please indicate any actions arising from completing this intial screening exercise

Given the high number of vacancies (approx 50) within the service it is planned that the head count reduction in 2020/21 will be met by vacancy management. Further discussions are taking place to consider the use of a Voluntary Redundancy trawl and a wider service redesign to consider further potential savings for further years. At this point no further equalities assessment is needed but will be kept under review in line with any wider service redesign.

Please indicate whether a full impact assessment is recommended

NO
