

# NATURALLY BIRMINGHAM: GREEN BITESIZE LEARNING

Here at Naturally Birmingham, we want to promote how fantastic working in the green sector is and all of the opportunities it has to offer. One of the best things about the green sector is getting interactive and learning on the job. We have created 3 videos, which include activities that are often used within the green sector:

1. Soil Jar Test
2. Measuring a Design Space
3. Estimating the height of the tree.

Please encourage students studying maths, geography, art or science and those that have an interest in the green sector to have a go – [you can find the videos here](#). We have created support packs to compliment the videos and highlight the relevant careers that apply to the activity and when or why you might use the activity.

We'd also like to offer careers seminars with sector professionals to talk with the students about what they learnt during the activity, gain feedback and talk about the next steps if they are interested in the green sector...

Don't forget to follow us on Twitter [@NaturallyBirmi1](#)  
[#greensector](#) [#skills](#) [#greencareers](#)

To receive the support packs and stay up to date with new videos please email me
