

Neighbourhoods Directorate

5th May 2021

Dear Tenant / Member,

Notification of Temporary Car Parking Arrangements: Back Straight Stand, Alexander Stadium, Perry Barr, Birmingham B42 2LR

I hope you have enjoyed the opportunity to witness first-hand, the re-development of Alexander Stadium into a world class facility.

The new West Stand structure has recently been completed, providing an iconic feature, and works are well progressed on the track and field facilities.

As part of the re-development, we will be re-modelling the Back Straight Stand car park, commencing on 17th May 2021. To minimise the impact of this on your enjoyment of the Back Straight Stand accommodation, we will be providing alternative, temporary parking arrangements for both Tenants and visitors to the Fitness Gym

This temporary arrangement provides a number of spaces within the existing HPC car park which will be accessed via Stadium Way. A number of accessible spaces (blue badge holders only) will be retained adjacent to the Back Straight Stand. The number of these spaces available will be consistent with the current provision, throughout the duration of the works.

Eligible users will be directed to the accessible spaces, as will delivery vehicles. These will use the park road, as is currently the case, although users returning to the Back Straight Stand following the easing of Covid restrictions will find that a vehicle checkpoint, managed by the construction site logistics team, has been established at the entrance to Perry Park.

In the interests of safety and in accordance with the site logistics policy, it will be necessary to advise the Building Manager of any deliveries or collections to the Back Straight Stand in advance, so that the logistics team is prepared and to avoid vehicles being turned away.

Tenants and Fitness Gym **users** using the HPC car park on a temporary basis are requested to park in the dedicated car park in front of the HPC – there is plenty of space in this car park, but we request that users park responsibly to make sure that all visitors are able to continue to enjoy its use.

Signage will be installed, directing Tenants and Fitness Gym users along a protected pedestrian route between the temporary car park and the Back Straight Stand. This route follows the line of the secure hoarding to the construction site. The route is level, will be lit during the hours of darkness, and is covered by security cameras. Crossing points have been installed on the park road.

Please find below a plan and photographs illustrating the temporary arrangements, in particular the pedestrian route between the HPC car park and the Back Straight Stand.

Facsimile: 0121 464 6035

These works are scheduled to complete in September 2021, but as the new car park will still form part of the wider construction site, in the interests of safety, we may seek to defer opening until after this date. We will, of course, inform you as the works progress.

Your safety is our concern, so we ask that you help us and the stadium contractor, by following the guidelines above.

We greatly appreciate your support as we work towards delivering a fantastic centrepiece for the Commonwealth Games for Birmingham and a lasting legacy for athletics and all sports.

Yours sincerely,

Dave Wagg
