

Index of sites in the Site Delivery Plan 2014 identified by the Inspector from the 5 Year Housing Land Supply 2014-2019

It is confirmed that EXAM25 should have assessed all sites in the current 5-year supply above the relevant size thresholds, with the exception of sites under construction.

The table below cross –refers the sites in EXAM3 to the relevant page of EXAM25, as requested.

This shows that there are six sites in EXAM3 which do not appear in EXAM25. The final column of the table explains the status of these sites. Three are now under construction and so were not assessed. In two other cases activity on the sites has begun (demolition in one case, and construction of a medical centre in the other). The final site was an omission.

For completeness an assessment of the three sites where housing development has not yet commenced has been undertaken and this is attached.

A separate schedule has been produced showing the sites in appendix 8 of the SHLAA in in alphanumerical order of ref number for the city as a whole without division by wards.
