# Birmingham COVID-19 Statistics

20 to 26 June 2022

Author: Dr Justin Varney (Department of Public Health)

Source: UKHSA data accessed 06/07/22; NHS T&T; NHS NIMS

In the 7 days up to 26 June 1,518 cases (133.1/100K) were reported, a 36.9% increase compared to the previous 7 days with 1,109 cases (97.2/100k).

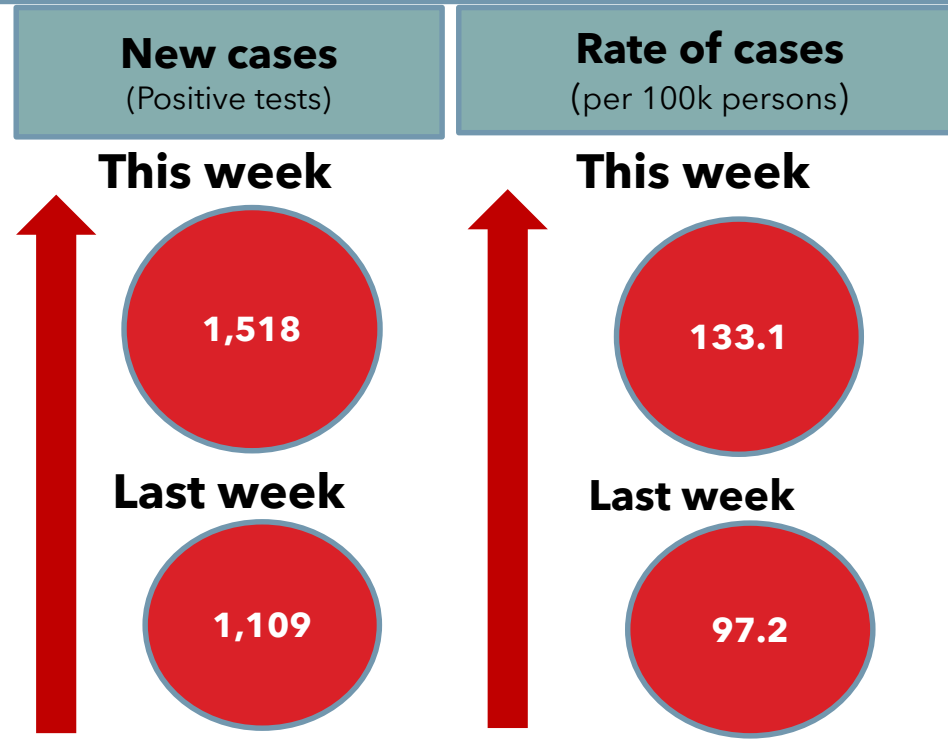

No more free symptomatic and asymptomatic (universal testing) for the general public.

- Healthcare/social care staff, older age groups and those most vulnerable will still get free tests.
- Free testing is available for people with symptoms if they are patients in hospital or eligible for treatments as they are at higher risk of getting seriously ill from COVID-19

Hospital admissions have increased. In the 7 days up to 5 July, 454 new cases were admitted, a 30.5% increase, compared to 348 admissions in the previous week.

COVID-related deaths did not change. In the 7 days up to 30 June, 2 death were reported which was the same as the previous week.

There has been a recent decrease in data confidence due to the fall in testing (following the end of universal free testing) and the discontinuation of wastewater analysis. Cases reported here are those positively identified in the city via a PCR or LFD test.

# Birmingham COVID-19 Statistics

20 to 26 June 2022

**Cases** in Birmingham have increased by 59.7% compared to previous 28 days. In the most recently reported 28 days (30 May-26 June) 3,978 cases were reported, a case rate of 348.8/100k.

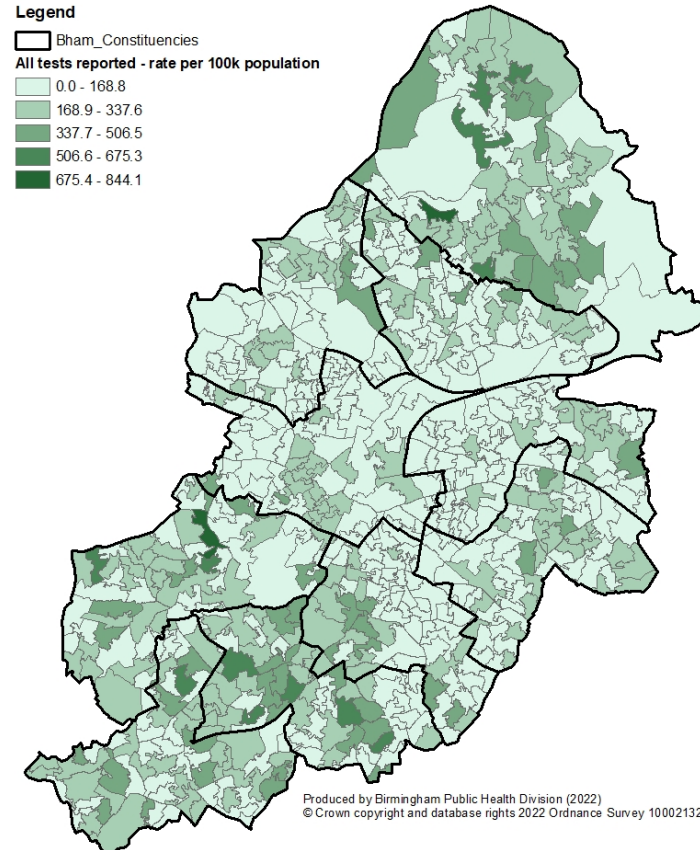

Our case surveillance is dependent upon residents reporting their test results; therefore, the absolute number of reported cases may be affected.

The **five wards** with the highest case rates (cases per 100,000 population) in the 28-day period are:

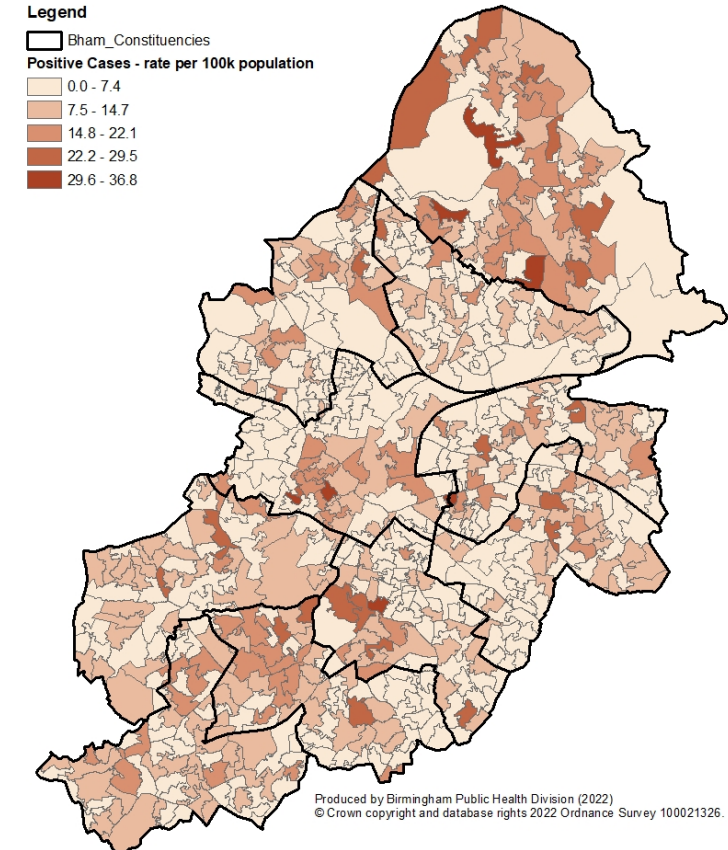

- Bournville & Cotteridge (814.5)
- Sutton Trinity (733.3)
- Northfield (730.9)
- Stirchley (679.7)
- Sutton Wylde Green (643.1)

## Birmingham ALL Reported Tests (Pillar 1&2, LFT & PCR): Last 7 days (latest available data)

Test Rate per 100k population by LSOA  
Birmingham Pillar 1 & 2 testing, LFT and PCR combined  
16 - 22 June 2022

Positive Case Rate per 100k population by LSOA  
Birmingham Pillar 1 & 2 testing, LFT and PCR combined  
16 - 22 June 2022

# Uptake in Birmingham Residents -1st, 2nd and Booster Doses

NIMS Data (Extracted 05/07/2022)

Vaccine 1st, 2nd and Booster % Uptake among Birmingham Residents

- Uptake of 1<sup>st</sup>, 2<sup>nd</sup> and booster doses remain consistently lower amongst under-50s compared to over-50s.
- Identified vulnerable groups including over-65s, clinically extremely vulnerable and COVID at-risk cohorts show good uptake of 1<sup>st</sup> and 2<sup>nd</sup> doses, with booster uptake between 54% and 83%.
- Booster uptake in NHS and social care workers is lower than the uptake of the 1<sup>st</sup> and 2<sup>nd</sup> doses.
- CEV - clinically extremely vulnerable group at risk of severe illness from COVID-19
- Carers LA/DWP - Carers under local authority or Department for Work and Pensions jurisdiction
