

# WILDLIFE AT KINGS NORTON CEMETERY

Primrose Meadow Natural Burial Glade and other areas of the cemetery which are managed as wildflower meadows are important wildlife habitats. There are also bug hotels, bird feeders and nesting boxes to encourage biodiversity. These are some of the plants, animals and birds which you can see in the cemetery.

## Trees

Hawthorn

Holly

Blackthorn

There are also lots of other tree species including English Oak and Crab Apple

Red Clover

Teasel

Meadow  
Buttercup

Wildflowers  
Bramble

Also Common Ragwort, Rosebay Willow Herb, Dock, and Common Hawkweed

## Birds and Animals

Blue tit

Grey Squirrel

## Rabbit

And lots of other creatures live in or visit the cemetery including Crows, Magpies, Wood Pigeons, Robins and Muntjac Deer.

This list will grow as we undertake wildlife surveys and learn about the biodiversity- including information about the insects and other mini beasts that live here.
