**Required cover of ducts:**

Carriageway - 750mm to top of duct.

Footway - 450mm to top of duct.

---

**Diagram Notes:**

1. Refer to Standard Detail sheets HW/12.54 - 12.58 for box installation details.
2. All duct access holes shall be cut cleanly using a sharp knife.
3. Carriageway trenches to be saw cut to a depth of 100mm prior to commencement of excavation.
4. Minimum depth to invert of ducts to be 850mm in carriageway and 550mm in footway.
5. Upon completion of the construction of a signal duct access chamber box, no cable tray to be installed until the chamber has been offered to the Project Manager for inspection and the relevant Quality Management paperwork completed and signed off by the Supervisor.
