OVERCROWDING

Household's accommodation having fewer bedrooms than required

49% Of Somali-born households were classed as overcrowded (8% national avg, 53% Somali identity).

A BOLDER HEALTHIER BIRMINGH

-DISCLAIMERS AND CONTEXT

POPULATION LIMITATIONS

The census data is limited and <u>does not</u> give any information on the Somali population who:

- Were born in the UK and have a British national identity only.
- Were born in the UK and have a British and Somali national identity.

The census data therefore is not reflective of the entire Somali population.

POPULATION SIZE ESTIMATES

The 2021 census was the first census which included a write in option for ethnicity for the 'Black African' ethnic group.

Some of the Somali ethnic group may have not provided an additional write in response.

Therefore, the number of people reporting being of Somali ethnicity is likely an underestimate.
