2011 Census: Key Statistics for Birmingham and it's constituent areas

KS107 Lone parent households with dependent children

This table is part of the 'Key Statistics for local authorities and local areas in England and Wales', the first release of the key statistics that add to the population estimates from the 2011 Census of Population for England and Wales that were published in July 2012.

This workbook provides Key Statistics for Birmingham Disticts, wards and other selected areas wards as at census day, 27 March 2011.

Wards are based on 'Best Fit' approximations calculated by the Office for National Statistics.

Results for Birmingham wards are based on allocation of whole Census Output Areas.

Data for any Census Output Area that is split by a new ward boundary are allocated to the ward that contains the greatest share of its population.

Notes and Definitions

- 1. The main population base for outputs from the 2011 Census is the usual resident population as at census day (27 March 2011). Although the population base for enumeration included non-UK short-term residents, these are not included in the main outputs from the 2011 Census, but are analysed separately. All outputs, unless specified, are produced using only usual residents of the UK. For 2011 Census purposes, a usual resident of the UK is anyone who, on census day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.
- 2. Further information about the census estimates, including details about the methodology used, information about data quality and a range of supporting information are available on the ONS website at http://www.ons.gov.uk/census

Definitions

Dependent child

A dependent child is a person aged 0-15 in a household (whether or not in a family) or aged 16-18 in full-time education and living in a family with his or her parent(s). It does not include any children who have a spouse, partner or child living in the household.

Employed (In employment)

A person aged 16 to 74 is defined as employed (or in employment) if in the week before the census they carried out at least one hour's paid work, either as an employee or self-employed.

This includes casual or temporary work, on a government-sponsored training scheme, doing paid or unpaid work for their own or family business, being away from work ill, on maternity leave, or on holiday or temporarily laid off.

Full-time working

Working full-time is defined as working 31 hours or more per week. This applies to the number of hours a person aged 16 to 74 in employment in the week before the census worked in their main job, and includes

Household

A household is defined as one person living alone, or a group of people (not necessarily related) living at the same address who share cooking facilities and share a living room or sitting room or dining area

A household must contain at least one person whose place of usual residence is at the address. A group of short-term residents living together is not classified as a household, and neither is a group of people at an address where only visitors are staying.

Lone parent family

A lone parent family consists of a father or mother with his or her child(ren) where the parent does not have a spouse, same-sex civil partner or partner in the household and the child(ren) do not have a spouse, same-sex civil partner or child in the household. A lone grandparent with his or her grandchild(ren) are also considered a lone parent family if there are no children in the intervening generation present in the household (note that children of the grandparent may also be present if they are not parents or grandparents of the

Lone parent household

A lone parent household is a household that comprises a lone parent family and no other person. This definition is used in most results from the 2011 Census.

In a small number of results a lone parent household is defined as a household that contains at least one lone parent family, but does not contain any married, same-sex civil partnership or cohabiting couples. When this definition is used it is clearly indicated.

Long-term unemployed

A person is defined as long-term unemployed at the time of the 2011 Census if they were unemployed and the year they last worked was 2009 or earlier.

Part-time working

Working part-time is defined as working 30 hours or less per week. This applies to the number of hours a person aged 16 to 74 in employment in the week before the census worked in their main job, and includes

Geographic information

Information about the geographic methods and principles used to produce 2011 Census results can be found http://ons.gov.uk/ons/guide-method/geography/products/census/index.html
