Executive summary

How many people accessed short term and long term support?

- 5,501 people accessed short term support.
- 16,057 people accessed long term support.

How much did it cost to provide adult social care?

- The net expenditure for adult social care for 2015/16 was £252.2 million.

How well did we do?

Compared with the previous year, our performance improved on measures of:

- People – especially older people – receiving care and support in their own home;
- Number of people experiencing delayed transfers of care;
- Outcomes of short-term services;
- Access to information and advice.

Compared with the previous year, our performance fell on measures of:

- Quality and control over daily life;
- Outcomes of reablement services following hospital discharge;
- Overall satisfaction of people who use care and support services;
- People who use services feel safe.

Introduction

Welcome to the 2015/16 Local Performance Account for Adult Social Care.

Within this document we provide you a summary of our progress for adults who are in receipt of our social care support over the past year.

The social care services provided for Adults in Birmingham form part of the wider Directorate for People. The Directorate is committed to improving the outcomes for all citizens who require care and support.

It is no secret to anyone who sees local and national media that the Directorate and City Council continue to face significant budget pressures. This has resulted in a review of how we currently provide front line services and how these will be provided to vulnerable adults in the future.

We remain passionate about providing services to safeguard adults and those people with the highest level of need will continue to receive the best social care support available.

Despite all the challenges that continue to face our front line staff, the Directorate is proud to say that we have national social care award winners. Birmingham had huge success at the National Social Work Awards in December 2015, with shortlisted workers from the Directorate. This shows we are a city that cares and can produce great social work.

This document clearly states how we have performed against national performance standards during the last year. Looking to the future we anticipate another difficult and challenging year with new opportunities. We are keen to work within local communities to meet your care and support needs closer to home. Our approach as we go forward remains to enable people to be as independent as possible throughout their lives.

We know that quality of care and support matters to the citizens of Birmingham and through our joined up approach with care providers, voluntary and community organisations, we are concentrated on ensuring that we improve the quality of life for those who need care.

We would welcome your views on this document, our performance and how well you think Adult Social Care performed in Birmingham.

Peter Hay CBE
Strategic Director
Directorate for People
Birmingham City Council

Councillor Paulette Hamilton
Cabinet Member
Health and Social Care
Birmingham City Council

What is adult social care?

What do we do?

Adult Social Care services in Birmingham support people aged 18 years and over to live as independently as possible in their local community.

What are our responsibilities?

We are responsible for the following:

- Assessment of your needs;
- Agreeing a support plan with you;
- Offering information about support and services available in the local community and throughout the city;
- Arranging services where appropriate;
- Providing community care support where this is appropriate;
- Offering support, equipment and adaptations to enable you to live safely and independently at home.

Who do we help?

- Citizens of Birmingham who require care and support;
- Citizens who provide voluntary care for relatives or friends;
- Young people with disabilities aged 14 and over that are in transition to adult social care services.

Care in Birmingham – Did you know?

OLDER ADULTS 65+

There were 22,965 **requests for support or care from new clients** in 2015/16, an **8.29% decrease** from the previous financial year.

4,265 citizens who have been **receiving care for twelve months or more** had their care reviewed in 2015/16, a **10.92% increase** from the previous financial year.

2,950 citizens were **living in a residential/nursing home on a long term basis** as at 31/03/2016 a **1.17% decrease** from 31/03/2015.

430 citizens were accessing **Direct Payment or part Direct Payment** as at 31/03/2016 a **1.15% decrease** from 31/03/2015.

4,310 citizens accessing **community based services** (excluding those receiving Direct Payments) as at 31/03/2016 a **10.23% increase** from 31/03/2015.

YOUNGER ADULTS 18-64

There were 12,225 **requests for support or care from new clients** in 2015/16, a **6.68% increase** from the previous financial year.

2,265 citizens who had been **receiving care for twelve months or more** had their care reviewed in 2015/16, a **3.82% decrease** from the previous financial year.

1,105 citizens were **living in a residential/nursing home on a long term basis** as at 31/03/2016 a **0.91% increase** from 31/03/2015.

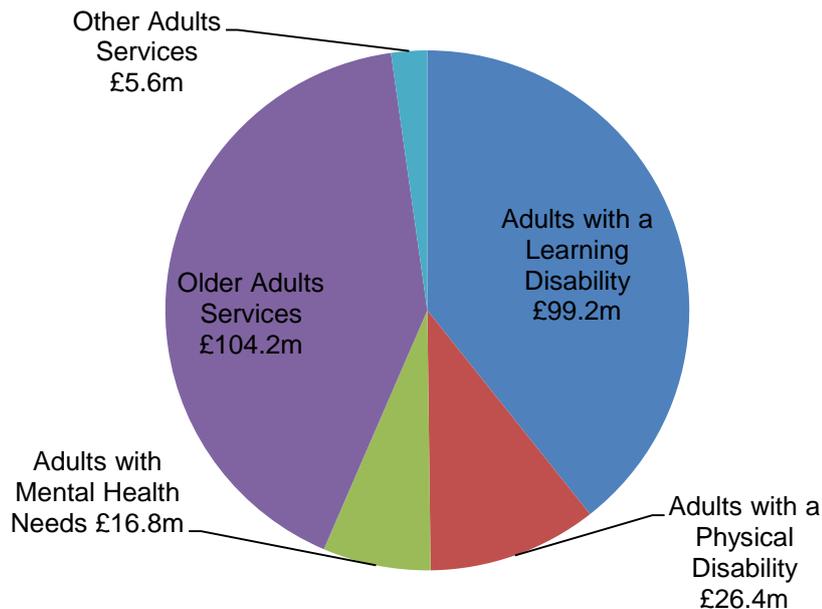

1,125 citizens were accessing **Direct Payment or part Direct Payment** as at 31/03/2016 a **15.38% increase** from 31/03/2015

1,965 citizens accessing **community based services** (excluding those receiving Direct Payments) as a 31/03/2016 a **23.54% decrease** from 31/03/2015.

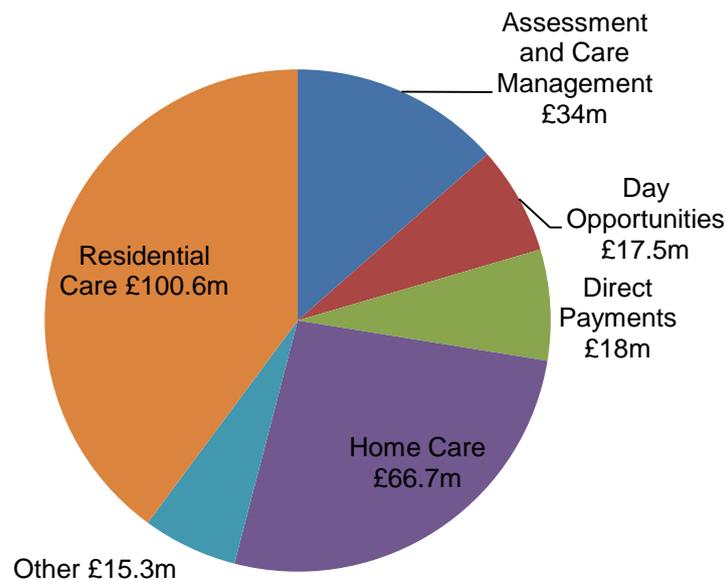

How is adult social care money spent?

In total, the net expenditure for adult social care services for the period 1 April 2015 to 31 March 2016 was £252.2m. This includes expenditure on assessment and care management as well as the direct costs of services delivered to citizens.

Adult Social Care Expenditure by Primary Need 2015/16

Adult Social Care Expenditure by Service Type 2015/16

Adult Social Care Outcomes Framework

The Adult Social Care Outcomes Framework (ASCOF) is a set of measures published by the Department of Health. They aim to measure the impact of adult social care support on a person's life. These measures are of value both nationally and locally for demonstrating the achievements of adult social care.

The ASCOF covers four areas, each having a number of outcome statements to monitor against. The areas are:

1. Enhancing quality of life for people with care and support needs;
2. Delaying and reducing the need for care and support;
3. Ensuring that people have a positive experience of care and support; and
4. Safeguarding adults whose circumstances make them vulnerable and protecting them from avoidable harm.

Our Local Performance Account is written around these four areas. For each area we outline what we achieved in 2015/16 and how we performed.

You can find more information about ASCOF on the Health and Social Care Information Centre website at <http://www.hscic.gov.uk/catalogue/PUB18657>

Our Overall Performance in 2015/16

To start with, we look at how we look at our average performance across all of the areas and compare this to all of the other local authorities in England.

In 2015/16, Birmingham's performance was:

- An average ranking of **101st** placing us at **148th** of 152 local authorities in England,
- **15th** of 16 similar local authorities.

For further information on our overall performance, please see Appendix 1.

Details of similar local authorities can be found in Appendix 2.

1. Enhancing quality of life for people with care and support needs

This measure looks at social care-related quality of life, including:

- People manage their own support as much as they wish, so that they are in control of what, how and when support is delivered to match their needs;
- People are able to find employment when they want, maintain a family and social life and contribute to community life and avoid loneliness or isolation;
- Carers can balance their caring roles and maintain their desired quality of life.

How well we did do in 2015/16?

a) Service user and Carer quality of life

Self-reported quality of life measure for citizens who use care and support services

We measured 'Quality of life' using the answers to questions in an annual survey we send out to people receiving a service from us. This is called the Adult Social Care Survey. The questions in the survey covered areas such as choice and control, personal cleanliness, access to food and drink, whether their home was clean and comfortable, safety, contact with other people, how people spent their time and the impact of needing help to do things.

RANK (out of 152)

100th ↓

Birmingham's Ranking against Comparator Authorities

The score of quality of life, as reported by people who use our services, only reduced slightly from 18.9 in 2014-15, to 18.8 in 2015-16. Our performance was comparable to the average for similar local authorities.

Social care-related quality of life score	Below average	Worsening
---	---------------	-----------

Self-reported quality of life measure for carers

We also carried out the annual survey with our carers (called the Carers' Survey) and from this; we found that their quality of life score had increased slightly from 7.1 in 2014/15 to 7.3 in 2015/16. Most local authorities only carry out this survey once every two years. Comparative data for other areas is not available this year.

Carer-reported quality of life

Improving

b) Control over daily life

By 'control over daily life' we mean people having the choice to do things or to have things done for them as they wish.

The results from the Adult Social Care Survey showed a reduction between 2015 and 2016 in the level of control people felt they had over their daily life.

The percentage of people who said they had 'as much control as they wanted' or 'adequate control' over their daily life was 71.1%, down from 73.5% in 2014-15, slightly below the average for the comparator authorities

e) Living in the community

Wherever possible people, with learning disabilities or mental health issues should live in their own home or with their family. Over the course of the year the proportion of service users living in the community has continued to increase. However, with respect to those with learning disabilities the proportion is still considerably below the national average. More positively, a higher than average proportion of people in contact with secondary mental health services do live independently.

---	---------------	-----------

f) Social contact

The Adult Social Care Survey collects information on the level of contact that people have with others in a social environment as an indicator of isolation. There is a well-evidenced link between social isolation and health and well-being.

44.6% of respondents have as much social contact with people as they wanted in 2015/16. This is an improvement on the 2014-15 result of 44% and the same as the average for our neighbouring local authorities.

--	---------------	-----------

2. Delaying and reducing the need for care and support

This measure is concerned with preventing people from becoming reliant on ongoing social care and support and, where they do, that it is provided in the most appropriate setting. It means that:

- everybody has the opportunity to have the best health and wellbeing throughout their life, and can access support and information to help them manage their care needs;
- people and their carers are less dependent on intensive care services as a result of earlier diagnosis, intervention and enablement; and
- when people develop care needs, the support they receive takes place in the most appropriate setting, and enables them to regain their independence.

How well we did do in 2015/16?

a) Admissions to residential and nursing care

In line with the strategic direction to increase independent living and care in people's own homes, we aim to reduce the number of people whose support needs are met by admission to residential or nursing care.

The number of clients of all ages placed into care homes fell between 2014/15 and 2015/16.

The proportion of new permanent admissions to residential care for people aged 18-64 years per 100,000 people was 16.3 in 2015/16. This was above the average of 14.6 for similar authorities and a slight increase from 2014/15.

The proportion of new permanent admissions to residential care for adults aged 65 and over per 100,000 people was 662.8 in 2015/16. This was below the average of 722.4 for similar authorities and a significant drop from 781.1 in 2014/15.

In 2015/16, 30% of the placements in the enhanced assessment beds service resulted in the person returning home. These are clients who would potentially have permanently gone into a care home without this intervention.

b) Reablement

There is strong evidence that reablement services lead to improved outcomes and value for money across the health and social care sectors. Reablement seeks to support people and maximise their level of independence, in order to minimise their need for ongoing support and dependence on public services. This measures the benefit to individuals from reablement, intermediate care and rehabilitation following a hospital episode, by determining whether an individual remains living at home 91 days following discharge – the key outcome for many people using reablement services. It captures the joint work of social services, health staff and services commissioned by joint teams, as well as adult social care reablement.

c) Delayed transfers of care

A delayed transfer of care is when a patient is ready to leave hospital but is prevented from doing so for one or more reasons. This measure reflects the ability of the whole care system (hospitals, community-based care and social care) to ensure that patients are transferred to the next stage of care and support appropriately. The average daily number of delayed transfers of care per 100,000 of the population in 2015/16 was 17.0, an improvement from 20.3 in 2014/15, but higher than the average for similar authorities (11.8).

d) Outcome of short-term services: Home care enablement

The home care enablement service helps you to relearn skills such as washing, dressing and cooking, or learn new ways of doing things, so you can live as independently as possible.

The home care enablement service may help if you:

- Have been in hospital and need help to learn how to manage when you get home;
- Are recovering from an illness or injury.

We saw an increase in the number of people starting an enablement service from 2,002 in 2014/15 to 2,549 in 2015/16. The service was also more effective, with the proportion of new clients completing an enablement programme who required no ongoing support at the end increasing from 48% in 2014/15 to 51% in 2015/16.

3. Ensuring that people have a positive experience of care and support

This is concerned with measuring people’s experience of care and support. It means that:

- people who use social care and their carers are satisfied with their experience of care and support services;
- carers feel that they are respected as equal partners throughout the care process;
- people know what choices are available to them locally, what they are entitled to, and who to contact when they need help; and
- people, including those involved in making decisions on social care, respect the dignity of the individual and ensure support is sensitive to the circumstances of each individual.

How well we did do in 2015/16?

We measured the effect of support on people using Birmingham’s adult social care services in terms of:

- satisfaction with care and support services;
- access to information and advice;
- involvement of, or consultation with, carers about support planning.

a) Satisfaction with care and support services

Citizens who use services

Using the results from the Adult Social Care Survey, we saw a decrease in the proportion of people who were ‘extremely’ or ‘very satisfied’ with their care and support services. This fell from 60.5% in 2014/15 to 57.2 % in 2015/16. It was also below the average of 62% in other similar authorities.

Carers

The results from our Carers' Survey showed us that 28.0% were 'extremely' or 'very satisfied' with the support they had received from the local authority during 2015/16. This is a reduction in satisfaction compared with 2014/15 (32.2%). National data is not available for comparison on this measure for 2015/16.

Overall carer satisfaction with support provided score

Worsening

b) Access to information and advice

Using the results from the Adults' Social Care and the Carers' surveys, we looked at the percentage of citizens who use services and carers who found it easy to find information about services. We found this had improved from 62.7% in 2014/15 to 64.9% in 2015/16.

71% of service users felt information was easy to find, and improvement from 69.2% in 2014-15. 58.7% of carers found information easy to find, compared to 52.4% last year.

c) Involvement of or consultation with carers about support planning

From the Carers' Survey, we found that 63.6% of carers said they were 'always' or 'usually' involved or consulted about the support or services provided for the person for whom they provide care. National data is not available for comparison on this measure for 2015/16.

Carers involved or consulted about support and services provided

Improving

4. Safeguarding adults whose circumstances make them vulnerable and protecting them from avoidable harm

This is concerned with keeping vulnerable people safe. It means that:

- everyone should be able to enjoy physical safety and feel secure;
- people are free from physical and emotional abuse, harassment, neglect and self-harm
- people are protected as far as possible from avoidable harm, disease and injuries; and
- people are supported to plan ahead and have the freedom to manage risks the way that they wish.

How well we did do in 2015/16?

Safeguarding people

We exceeded all the targets we set ourselves around how quickly we investigated potential safeguarding issues:

- 95.1% of safeguarding referrals were completed within 24 hours, above the target of 95.0%;
- 90.9% of safeguarding assessments were completed within 28 days of referral, exceeding the target of 80.0%;
- 84.0% of Case Conferences were completed within 38 days of referral, exceeding the target of 80.0%; and
- 88.9% of all audited Safeguarding cases were judged Good, exceeding the target of 85%.

We measure the effect of support on people using Birmingham's adult social care services in terms of:

- How safe people felt; and
- How safe services made people feel.

a) Proportion of people who use services who feel safe

In the Adult Social Care Survey, 68.2% of respondents said they felt safe in 2015/16. This is a slight decrease compared to 2014/15 (70.8%) and slightly below the national average.

Complaints and Feedback

The Citizen Voice Team is responsible for the management of the statutory complaints function for adult social care.

During 2015-2016:

- 147 statutory complaints were received, a reduction on the previous two years;
- 11 complaints were withdrawn during the process;
- 628 individual complaints were investigated, of which:
 - 391 complaints were not upheld,
 - 142 complaints were upheld,
 - 54 complaints were partially upheld,
 - 40 complaints were inconclusive, and
 - 1 complaint could not be resolved.
- The Adult Social Care teams in Assessment and Support Planning received the largest number of complaints (92), a reduction from 129 for the same service area last financial year;
- The statutory timeframe for responding to a complaint is six months: 131 complaints were responded to within that timeframe;
- Staff behaviour was the highest overall reason for complaints received (32);
- 6 Local Government Ombudsman complaints were registered;
- A further 146 requests did not meet the requirements for the statutory complaints process including 58 corporate 'Your Views' complaints.

How well do you think we did in 2015/16?

Appendix 2 – List of similar authorities

One of the ways in which we measure our performance is by comparing ourselves against a group of 15 other local authorities with a similar demographic profile to Birmingham. These are:

- Bolton
- Bradford
- Coventry
- Derby
- Kirklees
- Leeds
- Leicester
- Liverpool
- Luton
- Nottingham
- Oldham
- Sandwell
- Sheffield
- Walsall
- Wolverhampton
